BOOK FAIR

Rockford Students Explore the World of Books at Hosur Book Fair 2025
The school's visit wasn't just about browsing books – it was a celebration of the joy of reading and lifelong learning.
Their active engagement reflected Rockford's commitment to holistic education beyond the classroom.

The air was filled with excitement and curiosity as the Secondary students of Rockford Senior Secondary School visited the 14th Hosur Book Fair on 22nd July 2025, the final and most vibrant day of the 12-day literary extravaganza. Hosted at the Hosur Convention Centre, the book fair proved to be a treasure trove of knowledge, creativity, and cultural celebration.

**Speaking about the Book fair experience,
Students shared,
“This visit was not just a field trip. It was an
inspiration. It opened doors to imagination,
expression, and deeper learning.”**

CLASS IV

MULTIPLY TO SIMPLIFY: LEARNING THROUGH REAL-LIFE MATH!

Multiplication, one of the core operations in mathematics, opens the door to deeper understanding of concepts like division, fractions, area, and even algebra. Our Class IV students discovered how multiplication makes solving problems faster and easier by replacing repeated addition with smarter, quicker calculations. In this engaging activity, students explored real-life applications of multiplication by finding the number of square boxes in a quadrangle and calculating seating arrangements in the school library. Through this hands-on experience, they not only strengthened their math skills but also developed logical thinking and problem-solving abilities. The activity transformed numbers into practical knowledge, proving that multiplication isn't just about sums—it's a life skill.

WATER WONDERS OF TAMIL NADU: EXPLORING OUR LIFELINE DAMS- CLASS IV

Dams are not just walls that hold water — they are lifelines that nurture farms, light up homes, and quench our thirst. In this exciting project, students of Class IV explored the major dams of Tamil Nadu, including the mighty Mettur Dam on the Cauvery River, the essential Vaigai Dam, and the historic Periyar Dam.

Through this activity, students understood how dams support irrigation, water supply, and hydroelectric power, making them vital for both people and nature. The project sparked curiosity and helped children appreciate how water is stored, shared, and used wisely — creating awareness for sustainable water management in their own state.

CLASS II

Pop! Fizz! Learn! – A Bubble Exploration

The young scientists of Class II stepped into the world of wonder with “The Bubble Project.” Through joyful hands-on experiments, students explored how bubbles are formed using different solutions like soap and glycerine, and creative tools such as straws and wipes.

As they played, they observed how bubbles change in size, shape, and how long they last, learning basic science concepts like surface tension and air movement in the process. The project turned a playful activity into a learning adventure, sparking curiosity and promoting active exploration.

This engaging experience helped children build early observation skills, introduced simple chemistry ideas, and made science exciting and accessible — just like a bubble: light, fun, and full of possibilities!

WHEN SILENCE SPEAKS OF DREAMS

For the Day My Student Blooms
Those eyes that don't rise even when nudged,
Those glances that still look blank though the lesson is heard...
Within those silent faces,
I feel — as a teacher —
There lie the most beautiful dreams.
While everyone races toward success,
He looks up... searching for direction.
Even if he falls behind, I am not afraid,
Because I know — one day,
He will surely touch the sky.
I don't just teach from the book...
I teach hope, patience, and the strength to live.
Even when he refuses to open his eyes,
I can still see the light hiding within him.
Even a flower that blooms late carries fragrance...
A late-blooming child too will one day have their own special applause!

Ms. Violet Rupa, Head Mistress

என் மாணவன் மலரும் நாளுக்காக...

தூண்டிலும் எழாத அந்த கண்கள்,
பாடத்தைக் கேட்டும் புரியாத அந்த
விழிகள்...

மௌனமான முகங்களுக்குள்
மிகவும் அழகான கனவுகள்
இருக்கின்றன என்று
நான் உணர்கிறேன்... ஒரு
ஆசிரியையாக!

எல்லோரும் ஓடுகிறார்கள் வெற்றிக்காக,
அவனோ நிமிர்ந்துப் பார்க்கிறான்
திசையையே...

பின் தங்கினாலும் பயம் இல்லை
எனக்கு,

ஏனெனில் அவன் ஒரு நாள் வானத்தைத்
தொட்டே தீருவான்!

நான் கற்பிக்கிறேன் புத்தகத்தை மட்டும்
அல்ல...

நம்பிக்கையையும், சகிப்பினையும்,
வாழும் வலிமையையும்!

அவன் விழிக்க மறுக்கும்போது கூட,
அவனுள் ஒளிந்திருக்கும் ஒளியைக்
காண்கிறேன்!

"மெதுவாக மலரும் பூவுக்கும் வாசனை
உண்டு...

தாமதமான மாணவருக்கும் ஒரு நாள்
தனி உலகம் உண்டு!"
